

TITLE & INTRODUCTION

Australia's challenge to meet emissions targets

<p><u>Global leaders foresaw A. Albanese as a climate crisis changer</u> as mentioned in the first document of this dossier, a 2023 / opinion piece from BBC News Sydney. However, a VOA News report by Phil Mercer, published two months later (doc.2), indicated <u>Australia must intensify its / efforts. Citizens' scepticism* about reducing fossil fuel reliance, emphasized in a 2023 phys.org article (doc. 3), contrasts with Australia's 2014 dependence / portrayed in Lewis's political cartoon thus shedding light on Australia's challenge. Will Australia move from lip service to decisive action? /</u> While Australia is often considered as the <u>lucky country, its politicians and citizens are anxious but cautiously seek solutions.</u></p> <p>99 words</p>	<p>Presentation of each document :</p> <ul style="list-style-type: none">- Date- Author- Source- Nature <p>*scepticism (US)</p> <p><u>Idée principale du document</u></p> <p><u>Thème du dossier</u></p> <p><i>Key issue</i></p> <p><u>outline</u></p> <p>the introduction should not exceed 100 words</p>
